Certifications/Licenses

Core Java

Additional Information

SKILL SET:

- Programming Languages: Core Java, JDBC, Servlet, JSP, Hibernate
- Subject of interest: Manual Testing, SQL, HTML

Major project:-Infrastructure as a service on cloud computing

- In an Iaas model, cloud provides hardware, servers, storage and other infrastructure components. Iaas provide storage and operating system .The user is able to access cloud in local area network with the help of a routers and can perform his tasks. Infrastructure as a service is providing raw materials (compute, storage, network) to users' on-demand so that they can execute their workloads in a flexible and scalable environment.
- Customers pay on a per-use basis, typically by the hour, week, month or according to the amount of virtual machine space they use.
